Implant dentistry, Medical emergencies, Minor oral surgery

Dr. Alvin YEO Consultant Periodontist
Implant dentistry, Aesthetic periodontal surgery

and more.....

From time to time, we are proud to feature international educators from around the globe who bring their knowledge and skills to you.

International **Dental** Academy

Dear Colleague

Thank you for your interest in our Advanced Continuing Education (A.C.E) program. We would like to take this opportunity to present our Curriculum and Educational courses catalogue.

An exceptional dental practice should aim to achieve excellence in clinical treatment as well as excellence in client service. We started **T32 Institute for Advanced Continuing Education (ACE)** in 2005 with the purpose of providing dental professionals and their staffs the knowledge to achieve these goals. Our training programs had evolved and were receiving local and international attention. We were able to draw more and more dentists from countries like Hong Kong, China, Taiwan, Korea, Malaysia, Indonesia, Vietnam, Philippines and Australia who wanted to share and learn in our friendly environment. We outgrew our space and there was a need for expansion. We needed an auditorium, better training and hands-on operatories and dining facilities. In 2007, we relocated to a bigger space and renamed T32 Institute for Advanced Continuing Education (ACE) to **International Dental Academy**

International Dental Academy recognizes a need to provide dental professionals with knowledge, skills and expertise required for the field of dentistry that is constantly evolving through the development of new clinical techniques and the emergence of new dental biomaterials. In this brochure, you will find the courses we offer in 2008 - 2009 locally and internationally. At **International Dental Academy**, we provide 3 types of training formats. They are **Lecture modules**, **Workshop modules** and **Residency modules**. These modules are ideal for practitioners and their team members who wish to enhance and enrich their knowledge and skills.

The ability to grow in the clinical practice is through continuing education and training after dental school. We can learn a great deal from local and international experienced dentists that are willing to share their knowledge and mistakes. Truly, it is very much easier to learn from other dentists' mistakes than to learn the hard way ourselves.

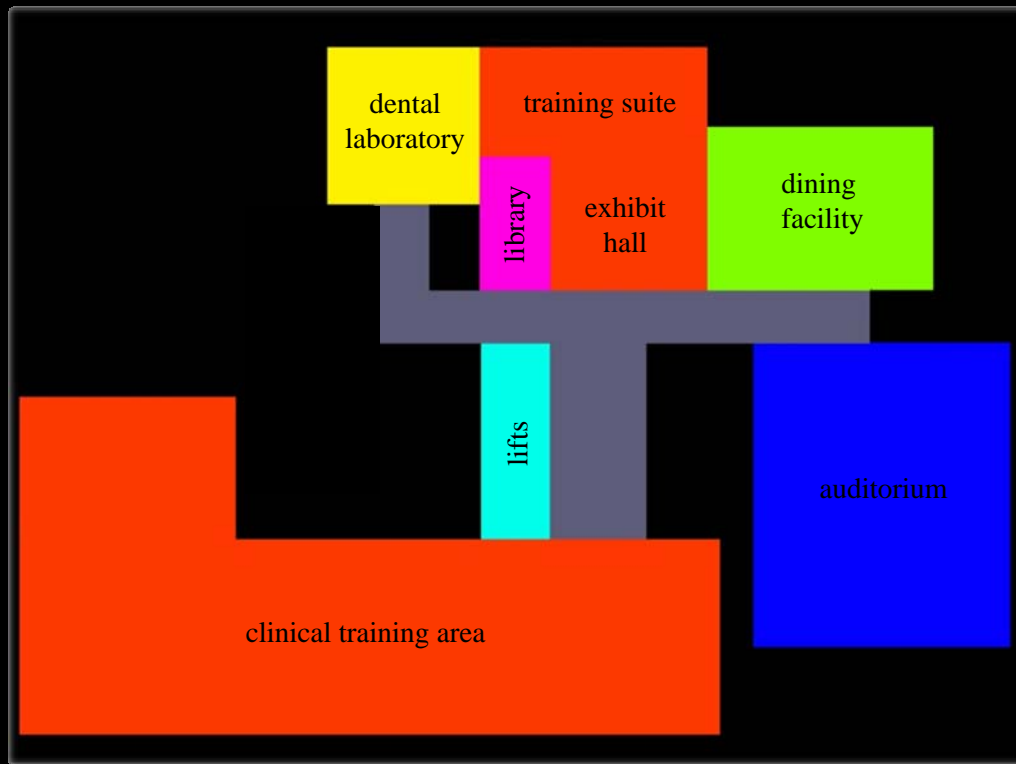

Our training formats aim to provide practicing dentists knowledge in step by step diagnosis and complex treatment planning. Mastery of the skills taught in these modules allows each dentist to practice a level of dentistry which is enjoyable and predictable and makes the experience for their patients truly exceptional.

We hope you will enjoy going through this brochure. It provides a detailed outline of our Curriculum and Educational courses for 2008 - 2009. **International Dental Academy** is pleased to provide these courses and looks forward to seeing you in the near future.

Best wishes,

Dr. Keng-Mun WONG
Clinical Director
International **Dental** Academy

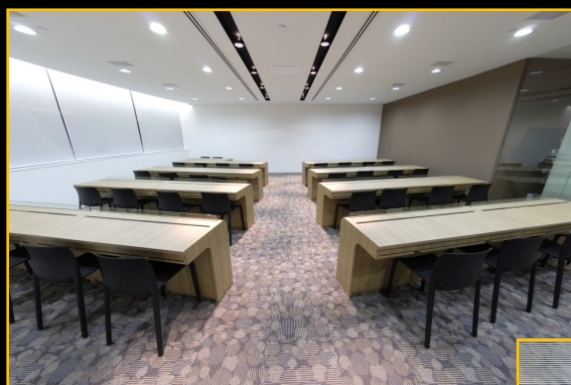

Layout of International **Dental** Academy

Floor area: 11500sq ft

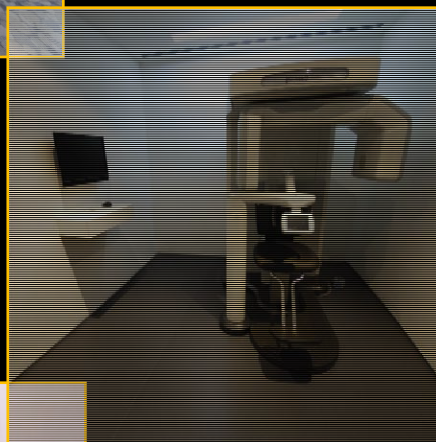

Custom built teaching facility
Latest materials and equipments
Live demonstration operatories
Interactive learning atmosphere
State of the art audio-visual systems

International **Dental** Academy offers dentists an ideal opportunity to improve their skills in a hands-on environment while utilizing the latest materials and equipments. New techniques and technology are taught under close supervision of our faculty.

Comprehensive Aesthetics

Lecture modules:

Fixed Prosthodontics

1. Aesthetic treatment planning
2. Temporary crowns/bridges made easy
3. Advanced restorative management
4. Advanced restorative aesthetics:
Management around teeth, pontics and implants
5. An evidence based and practical approach
to restoration of endodontically treated teeth
6. To restore or to remove: A clinical dilemma?
7. Restorative success and failure:
The good, the bad and the ugly
8. PFM or All ceramic. Is it time to change?

Workshop modules:

Fixed Prosthodontics

1. Aesthetic techniques & materials updates
2. Aesthetic and restorative workshop 1
3. Aesthetic and restorative workshop 2

Comprehensive Aesthetics

Lecture modules:

Removable Prosthodontics

1. Conventional partial and full dentures
2. Implant supported removable prostheses

Lecture modules:

Special Topics

1. Free hand composite bonding:
Achieving ultimate aesthetics
2. Digital dental photography and presentation

Course director : Dr. Keng Mun WONG

Smile design & complex fixed prosthodontics

Residency module:

1. Personalised learning (1 year)

Upon completion of 12 lecture modules and 3 workshop modules, participants will learn the skills and techniques needed to aesthetically treat complex restorative and prosthetic cases.

Our objective is to allow the opportunity to explore the different options of interdisciplinary care and prosthetic possibilities focusing on long term functional and aesthetic success.

Comprehensive Implant Dentistry

Lecture modules:

1. Patient selection and diagnosis and treatment planning
2. Diagnostic imaging and implant planning software
3. Implant dentistry: rationale for implants
4. Surgical procedures and suturing techniques
5. Immediate function vs Immediate loading
6. Implant occlusion in clinical practice
7. Management of the deficient alveolar ridge
8. Implant aesthetics
9. Management of complex implant prostheses
10. Basic implant prosthodontic techniques
11. Management of complications and implant maintenance

Workshop modules:

1. Implant techniques & materials updates
2. 'Live' demonstration: Basic implant surgery
3. 'Live' demonstration: Bone grafting
4. 'Live' demonstration: Sinus grafting

Residency module:

1. Implant residency program (2 years)
2. Personalised learning

Clinical Occlusion

Course director : Dr. Keng Mun WONG

Lecture modules:

1. Occlusion in clinical practice I
2. Occlusion in clinical practice II
3. Restoration of the worn dentition

Workshop module:

1. Ultimate occlusion: Steps to functional success

Advanced Occlusion

Course director : Dr. David TAY

Lecture modules:

1. Management of temporomandibular disorders:
How to identify 'dangerous' patients?
2. The dentist role in sleep medicine
Snoring and sleep apnea

Restorative Dentistry

Course director : Dr. Bruce LEE
Dr. Rudy SHAHAN

Lecture modules:

1. Free hand composite bonding:
Achieving ultimate aesthetics
2. Vital teeth bleaching: A clinical overview
3. Adhesive dentistry A to Z

Workshop module:

1. Direct anterior composite build up
2. Direct posterior composite build up

Practice Management

Course director : Dr. Peter TAY

Lecture modules:

1. 4 Handed Dentistry - Functional Assistant
2. Positioning and branding Yourself & Your Dental Practice
